Now as the square of a number of tens gives at least hundreds, it follows that three times the squares of the tens by the units, must be found in the part 398 to the left of 23, which is separated from it by a point. Therefore, dividing 348 by three times the square of the tens, which is 48, the quotient 8, will be the unit of the root, or something greater, since 398 hundreds is composed of three times the square of the tens by the units, together with the two other parts. We may ascertain whether the figure 8 is too great, by forming the three parts which enter in 39823, by means of the figure 8 and the number of tens 4; but it is much easier to cube 48, as has been done in the above table. Now the...
