Paperback. Condition: New. 444 pages. Many of us take communicating with one another for granted; fact is, however, that effective communication is similar to magic - when its present, everything seems to click. We are happy, things get done, we live stress free, and we feel confident that we can resolve any problem with the power of words. . . Let me ask you a question: How would it impact your life, at this very moment, if you could significantly improve your relationships with your coworkers, managers and subordinates, clients, parents, spouse, child(ren), and other significant people in your life? What if there was a super easy system that could help you better understand your behavior and the behavior of those around you, and as a result improve your personal and professional relationships? Would it be worth the effort to give that system a try? If you could improve your relationships dramatically with everyone around you, how much stress would be taken away from your days? How much more joy would you get out of your time spent with your family and friends? How much more satisfaction would you have at your workplace? Creating better relationships, through improving one's communication and people skills, is not only possible for anyone who is willing to put forth the necessary effort, but it is also undeniably the most crucial to any individual's success, both at home and at work. In fact, I'd go so far to say that good communication and people skills are the most important skills one can acquire. There's no amount of organizational and technical skills that can make up for the lack of good communication skills both at home and at work (except, perhaps, in some highly technical or repetitive mechanical jobs where one can get by without communicating much with...
